

SOLAR WATER PUMP

—DC/AC PUMP

Solar pump system can be applied to daily use(groundwater).Agricultural irrigation,foersty ieweigation,desert control,pasure animal husbandry,water supplier for islands waste water treatment engineering and so on,solar tech solar pumping system is depends on energy storing devices,and stors water innstead of electricity.It improve the device,and at the same time it lowers the constru- ctyion and maintenance cost if the system dramatically.In recent years, with the promotion of the utilization of new energy resouces,solar pump system are widely used in municial engineering,city centre squares,parks,turist siters,resorts and hotels,the landscapes and fountain system in the residential areas.

Work Principle

★ FEATURES:

- ▶ 304 S/S pump shaft
- ▶ IP65 waterproof grade
- ▶ 2 years warranty for pump
- ▶ Waterproof and leak-proof
- ▶ Automatically start and stop working
- ▶ Reduce the consumption of solar panels
